
Adjustable Steel Shelving long span boltless heavy duty racks

Our [long span metal shelving](#) is designed for storing small to medium sized goods in commercial and industrial warehouses where goods are fast-moving and require easy access. It is basically an [ideal storage system](#) for hand stacking plus, the shelves are adjustable and can be customized as per the storage requirements.

This is a very useful and versatile storage solution for commercial and industrial warehouses. Long span metal shelving can provide an efficient way to store and organize small to medium sized goods, while allowing for easy access to them. The fact that the shelves are adjustable and customizable means that they can be tailored to the specific needs of the warehouse and the types of goods being stored.

Additionally, the hand-stacking capability of this type of shelving system can be very convenient for workers, as it allows them to easily move and reorganize the goods as needed. This can be especially important in fast-moving warehouse environments where efficiency is key.

Overall, long span metal shelving can be a great choice for businesses that need a flexible and efficient storage solution that can adapt to their changing needs over time.

Description	Upright Specification	Beam Specification	Thickness of the shelf	Load capacity/layer
